Motivated CS graduate from Netaji Subhash Engineering College with 7 months experience in software development. Seeking to use proven skills in JavaScript, Typescript and project management via JIRA, Notion to meet business needs.

Experience

Hoggy

Software Development Engineer - I | Feb 2022 – present

- Worked heavily on the integration of business analytics tools like MoEngage & Mixpanel with Next.js which led to smoothen user tracking.
- Contributed to building sleek UI using React, Typescript, Next.js, Styled-components, Redux & React-query.
- Wrote unit test cases for Go APIs while migrating from monolithic to microservices infrastructure.
- Wrote CI script for vercel deployment link generation before going to production.

Codemancers

Frontend Intern | Nov 2021 – Dec 2021

- Improved code quality and contributed to an ongoing project by following TDD approach using React, Typescript, RTL & Jest
- Contributed to the Open Vpn profile management of the organization using Hapi.js, Typescript & Prisma.

Strive

Frontend Intern | Nov 2020 – Jan 2021

- Contributed to the development of the platform's dashboard using Next.js and Tailwind.
- Used a wide-column No-SQL Database (AWS Dynamo DB) for carrying out CRUD operations.

Projects

Open-source contributions

- Fixed a documentation bug of an Open-source authentication library (NextAuth) by correcting authstate of client-session API.
- Improved UX issue of an open-source community website (Layer5) by adding delayed mount and unmount animation of the scroll to top button.

Personal Projects

Covlive

- A covid case tracking application providing accurate statistical data and rising cases using a 3rd party API's data and visualizing affected areas using Mapbox's maps.

🔗 Code | 🌐 Live

Jobseek

- Job-providing web app with an end goal to create a platform for referral job posting.
 - Tech-stack: React, Node (Express), MongoDB (Mongoose), Redis.
- 🔗 Code

Nike Redesign

- E-commerce application with all the required crud functionalities like wishlisting, buying, order-tracking etc.
 - Tech-stack: React, Node (Express), Postgres (Prisma)
- 🔗 Code

Lip Reading (Final year project)

- Worked on both ends and built an application that has options to capture pictures based on a timer or a single click to detect user lip movement to predict words.
 - Tech-stack: React, Typescript, Python (Flask), Websockets (Flask Socket-io)
- 🔗 Code

Mini projects

- Twitter Clone (React, MUI, Firebase)
- Debounced Google Search (React, Typescript)
- Netflix UI clone (React, Redux)

Skills

Coding Languages

HTML, CSS, Javascript, TypeScript.

Frameworks/Systems

React and its ecosystem (Frameworks like Next.js and Global state management libraries and tools like Redux, Redux Toolkit, React Query, Storybook), CSS (Sass, tailwind, etc). Firebase, Server-side templating and Building REST APIs with Node (Express), CI/CD (Github Actions)

Databases

Mongodb (MQL, Atlas, Mongoose), SQL using Postgres (Prisma).

Education

Netaji Subash Engineering College

B.Tech in Information Technology.

2018-2022
